- **MFF 10** : AATCC Methods : 15, 61, 101, 105, 106 and 107. ASTM Methods : D 204-82.
Cold Cut – We recommend cold cut for stationary tests, i.e. test done in a perspirometer.
Heat Sealed – We recommend heat-sealed edges for increased stability in any physical action test such as wash fastness testing.
- **MFF 10A** also known as **ISO Adjacent Fabric 'DW'** : ISO Document 105F10 1989(E), Approved for use in Marks & Spencer testing as well as several other corporate specification.

★ Various types of products are supplied by cutting and vacuum packaging for storage and management.

We cut to the standard 5x5cm, 8x8cm, 10x10cm dimensions and customer requested dimensions, and supply 100 sheets each in a pack.

Due to the many types of contaminated fabrics and difficulty in management, we proceed with order import. Delivery time will be provided within 30 days after ordering the product.

★ If you request a sample, we can request it and send it to you when ordering regular products, but it may take some time.

★ Storage and management of contaminated cloths: Keep most products in a cool place below 3°C, away from direct sunlight. Depending on the product, some products are stored frozen.
